**Jubilee Session of 50th Anniversary of PSTAEE**

The purpose of the Joint Conference ELMECO and Seminar AoS is to gather some recently developed and new aspects of electromagnetic and superconducting applications in environment protection. The events are focused on knowledge exchange in the field of electromagnetic devices and processes in environment protection and modern superconducting materials and devices. It will promote some practical and industrial applications related to the subject. The oral and poster sessions are intended. The official conference language will be English.

### **Publication**

Short papers up to two pages prepared according to the rules included in the attached file will be published in the Conference Proceedings prior to the conference.

Extended four page papers may be recommended for publication in the post-conference issue of journal “Przegląd Elektrotechniczny” (“Electrical Review”). They should meet the rules of this journal: <http://www.red.pe.org.pl/>. The publication language is English or Polish.

### **Conference topics**

The conference ELMECO-7 will include the following topics:

- plasma and ozone technologies to air, water, soil and wastes decontamination,
- electromagnetic compatibility, influence of electromagnetic fields, noise and vibration on living organisms and environment monitoring,
- renewable energy sources to supply electrical devices and home power plants.
- computer aided designing of electromagnetic devices and processes,
- micro- and nanomaterials,
- other related subjects.

The seminar “Applications of Superconductors” AoS-10 will include the following topics:

- phenomena in superconductors,
- superconducting materials, wires and tapes,
- energy saving superconducting devices (cables, magnets, fault current limiters SFCL, magnetic energy storage SMES, transformers, bearings, machines, SQUIDS) and their applications.

### **Conference Venue**

The Conference will be held in Nałęczów, a popular resort located 25 km from Lublin – one of the main cities in the eastern part of Poland, placed within the distance of 165 km from Warsaw.
